

## Upper Cervical DEFINED

# UPPER CERVICAL CORRECTIVE HEALTH CARE

THE ALTERNATIVE HEALTH CARE THAT RESOLVES ACUTE AND CHRONIC HEALTH PROBLEMS WITHOUT THE USE OF HARMFUL DRUGS AND PAINKILLERS

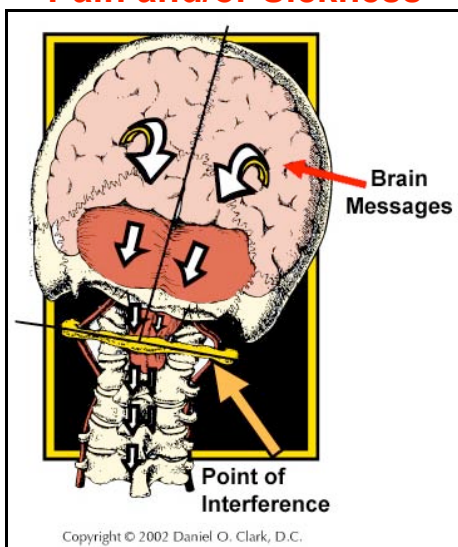

Brain health and healing messages leave the brain by way of the brain stem, pass through the neck, down the spinal cord and out over the entire nervous system to all parts of the body.

These messages control, monitor and maintain everything that goes on in the body. They also direct all body healing!!

A fall, automobile accident, whiplash, bad sleeping habits, a bump on the head, bad posture or even a difficult birthing process can cause muscles of the neck to contract and hold the head and neck in a misaligned position.

*Often you can stand up straight and look into a mirror and actually see that the head leans toward one side.*

### Pain and/or Sickness

### Misalignment

Upper Cervical misalignment can disrupt or distort the normal flow of brain health and healing messages to the body.

This leads to the development of acute and chronic health problems.

That part of the body not able to communicate efficiently with the brain will begin to develop problems.

These health problems will continue to develop until normal brain to body communication is restored.

Upper Cervical Corrective Health Care is both logical and effective and has resolved countless health problems.

### The Corrective Procedure

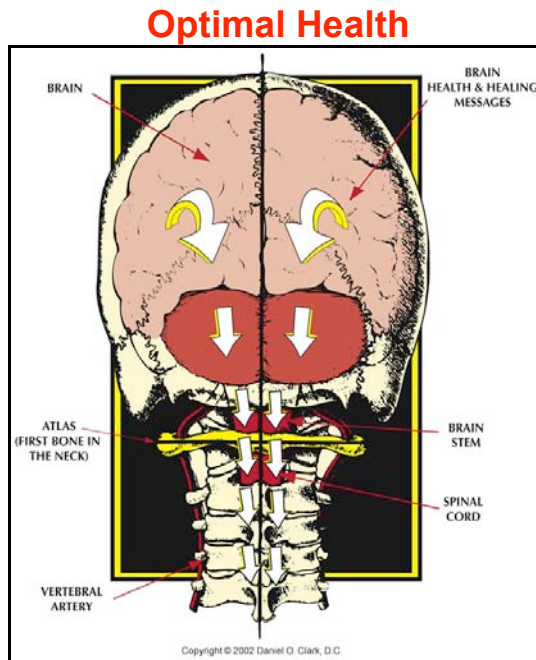

The procedure is designed to remove misalignment interference at the top of the neck to restore the normal flow of brain healing messages to the body, so its natural self-healing process can begin.

The Upper Cervical Doctor will make precision x-rays of the head and neck.

The x-rays will show the degree of misalignment.

They will also enable the doctor to develop a correction formula.

The doctor will use the formula to restore head/neck alignment. This alignment correction is barely felt by the patient and requires no forceful twisting, pulling or jerking motion of the head and neck.

### **Alignment**

Immediately after the correction, the brain will begin sending healing messages to that part of the body affected by the misalignment.

Restricted flow of brain health and healing messages is too often the undetected cause of numerous health problems.

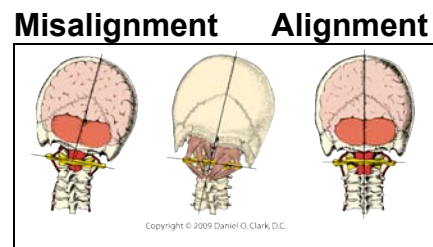

On follow up visits the Upper Cervical Doctor will help patients maintain their alignment correction so there is no interference in the body's self healing process.

Since brain health and healing messages control everything that goes on in the body, any interference in this process will disrupt or prevent healing.

This explains why a continuous flow of uninterrupted brain messages to the body is so important for optimal health.

When the brain cannot communicate effectively with some part of the body due to misalignment interference at the top of the neck, health problems will begin to develop.

When the brain can communicate with all parts of the body without interference, the body has the natural ability to regain and maintain optimal health.

### **The Doctor's Objective**

The objective of the Upper Cervical Doctor is to help each patient maintain their alignment correction, so there is no interference in the body's self healing process.

This will help patients enjoy optimal health and a better quality of life without the use of harmful drugs and painkillers.

Upper Cervical Health Care is a natural, safe and cost effective alternative care for children and adults of all ages.
